

### PERFORMANCE

The Duroplex Dimensional Metals (DDM) line offers exciting and unique finishes. Unlike many of the metallic finishes available on the market today, a DDM finish is Duroplex tough. DDM finishes incorporate most of the performance characteristics associated with standard Duroplex finishes, scrub & abrasion resistant (8000 scrub cycles), mildew resistant, class "A" flame & smoke, and a 10 year written product warranty.

### USING BACKGROUND COLOR

Due to the translucent nature of the DDM pigments, we have found that medium and darker toned background colors are necessary to produce the appropriate effect. Pastels and off white backgrounds do not work with the DDM pigment set, therefore, Triarch will not provide samples of DDM finish in pastel or off white backgrounds.

### DDM COLORS

- Gold
- Iron
- Niobium (purple hue)
- Copper Oxide (green hue)
- Bronze
- Silver

### FINISH OPTIONS

- Alexandria – a smooth textural effect with mottled metal shimmers
- Luxor – a heavily textured effect abraded by the sands of time
- Cairo – a vertical, almost rubbed effect

Additional finishes are under development.

### SPECIFYING DDM

Use standard Duroplex specifications in the construction documents when selecting Duroplex Dimensional Metals (DDM) finishes. Be certain to detail finish selected in section 2.01 of the specifications. The project design professionals are responsible for ensuring that the project specifications are suitable for the project. For assistance in preparing your specifications, contact Triarch.
