

ARCHITECTURAL COATINGS, INC.

REVITALIZATION IN 2016

Providing high quality specialty coatings for any vertical substrate, interior or exterior, new or old.

<http://archcoatingsinc.com>

This month we are highlighting the effects of using Triarch Skimm and Reformit over block to revitalize and make new, existing substrates and interior Granyte

HIGHLIGHTED PROJECT

Perryville Elementary School
901 Maywood Avenue
Perryville, Maryland 21903

Perryville Elementary School was closed for two years to undergo an extensive renovation. The original structure was built in 1955 and additional wings were added during the 1960s, '70s and '80s. Architectural Coatings installed just over 6000 sq. ft. of Triarch Granyte top coated with Acrylic Glaze. The existing substrate was prepped with Triarch's Reformit and *Skimm* to create a new pallet and eliminated the need to adjust windows, door jams, electrical outlets, etc....

The photos below reveal the transformation from outdated block to a new revitalized look.
